Margins365 v20.1: Answers to Developer Questions

11 November 2026

Purpose

Answers to the open questions on the v20.1 P0/P1 gap list. Source of truth: Margins365-v20.1-Changes and Spec v20.1.

Decisions (approved by Akthar, 11 Nov 2026)

Item	Question	Decision	Status
K91	Pause live sign-ups and real trials until all P0 gaps are fixed?	**No pause.** Live trials stay open. Because cancel does not reach Stripe yet, GA-01 (cancel through Stripe) is the first P0 to ship. Until it does, check any cancellation request by hand in the Stripe Dashboard.	Decided
K92	Turn on Stripe's own customer emails as a stop-gap?	**Yes.** Turn on receipts, failed-payment and trial-ending emails until our SES emails are built. Note that Stripe's trial-ending email goes 7 days before the end, not 3. Our own 3-day reminder (GA-18) is still required.	Approved
K93	Send a confirmation email when someone changes plan?	**Yes.** Send it via SES after Stripe confirms the change. Include the old plan, the new plan, the effective date, the new price in pence including VAT, the proration and the new order limit.	Approved
K94	Add a self-serve "Delete my account now" button at launch?	**Not at launch.** Cancelling already wipes data at the end of access. Handle early deletion requests through the privacy contact with an admin tool, within the GDPR one-month deadline.	Approved

Answers from existing policy (no decision needed)

- **Status labels:** GA-01, GA-02, GA-17, GA-21, GA-28, GA-29 and GA-32 are only "Fixed" once QA has passed them with evidence. That means Stripe test-mode dashboard checks, a received email and a second-device check. Until then, mark them "Built, awaiting QA".
- **GA-32 SES production proven:** this needs screenshots of production access, a verified identity, DKIM and MAIL FROM, plus a test email received at a non-team address.
- **GA-55:** every "Cancel before day 14 and pay nothing" wording must go. Replace it with

"Cancel before your trial ends (date shown at Checkout and in Plan & billing)".

- **GA-28:** the contact pop-up, the line under the button and the visitor confirmation email must read exactly "Thank you for contacting us, we aim to respond within 24 hours." The visitor's confirmation must not include their message text.
- **GA-40 to GA-44:** product data must be stored on the server for each shop; the browser may only cache it. Order limits are enforced on the server. Data is wiped at the end of access, with backups cleared within 7 days, and the account then closes. The Privacy Policy wording only becomes true once this is built.
- **Release rule:** no screen or email may show success unless the server, and Stripe where money is involved, confirms it.
- **Fix order:** all P0s first, then the P1s, then a mobile re-test (GA-64). Release only when no P0 or P1 is open.
